

vertical ergonomic mouse

Grip Mouse Wireless

Ergonomic: eliminates arm twisting by keeping the forearm in a neutral position

Buttons: 2 buttons and separate scroll wheel (third button)

Optical: optical sensor for precise movements

Price: favorable price/ quality

Connection: wireless USB

Research

Unnatural postures are a risk factor for development of complaints of wrist and forearm (Karlqvist 1994, Jensen 1998, Hagberg 1994). When the mouse is positioned closer to the body the strain of shoulders and neck decreases (Armstrong 1995, Cook 1998). Productivity is lower when using a trackball and touchpad, standard mice and pen tablets enable a higher productivity.

1

1. Neutral position forearm

2. Wireless
